First-aid measures

Description of first aid measures

General advice	Immediate medical attention is required. Show this safety data sheet (SDS) to the doctor in attendance.

Eye contact	Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician if you feel uncomfortable.
Skin contact	No harm in a general situation. First aid is not needed.
Ingestion	Do not induce vomiting. Never give anything by mouth to an unconscious person. Call a physician or Poison Control Center immediately.
Inhalation	Move the victim into fresh air. If breathing is difficult, give oxygen and consult a physician immediately.
Protecting of first-aiders	Ensure that medical personnel are aware of the substance involved. Take precautions to protect themselves and prevent spread of contamination.

Most important symptoms/effects, acute and delayed

1	Please see section 11.

Indication of any immediate medical attention and special treatment needed

1	Treat symptomatically.
2	Symptoms may be delayed.

Fire-fighting measures

Extinguishing media

Suitable extinguishing media	Misty water，alcohol-resistant foam , dry powder, , dioxide, sand.
Unsuitable extinguishing media	Do not use a solid water stream as it may lead to liquid splash and hurt firefighters.

Specific hazards arising from the substance or mixture

1	Development of hazardous combustion gases or vapor possible in the event of fire.
2	Not considered a significant fire risk, however containers may burn.

Advice for firefighters

1	As in any fire, wear self-contained breathing apparatus（MSHA/NIOSH approved or equivalent) and full protective gear.
2	Fight fire from a safe distance, with adequate cover.
3	Prevent fire extinguishing water from contaminating surface water or the ground water system.

6 Accidental release measures

Personal precautions, protective equipment and emergency procedures

1	Use personal protective equipment,do not breathe gas/mist/vapour/spray.
2	Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges.
3	Evacuate personnel to safe areas. Keep people away from an upwind of spill/leak.

Environmental precautions

1	Prevent further leakage or spillage if safe to do so.
2	Discharge into the environment must be avoided.

Methods and materials for containment and cleaning up

1	Cut off the source of the leak as much as possible.
2	Keep leaks in a ventilated place.
3	Absorb spilled material in dry sand or inert absorbent. In case of large amount of spillage, contain a spill by bunding.
4	Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.
5	Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container.

7 Handling and storage

Precautions for safe handling

Protective measures

1	Handling is performed in a well ventilated place.
2	Avoid contact with eyes.
3	Operators must be specially trained to strictly abide by the operating procedures.
4	It is recommended that operators wear self-priming filter dust masks and chemical safety glasses.

Measures to prevent fire

1	Keep away from heat/sparks/open flames/ hot surfaces.

Measures to prevent aerosol and dust generation

1	Not applicable.

Advice on general occupational hygiene

1	Wash hands and face after using the substances.
2	Replace the contaminated clothing immediately.

Conditions for safe storage, including any incompatibilities

1	Keep containers tightly closed.
2	Keep containers in a dry, cool and well-ventilated place.
3	Keep away from heat/sparks/open flames/hot surfaces.
4	Store away from incompatible materials and foodstuff containers.
5	It is forbidden to use mechanical equipment and tools that are prone to sparks.
6	The storage area should be equipped with leakage emergency treatment equipment and suitable containment materials.

Specific end use(s)

1	In addition to use mentioned in the first parts, unforeseen other specific end uses.
