

#### **POLYNEON #40**

This is a standard weight for all types of embroidery. Made from 100% polyester, it is strong and constructed of a specially developed raw material intended to eliminate looping, puckering and thread breaks. Vibrant colors are glossy, as well as resistant to chlorine bleach, making this thread ideal for commercial linens or any application where the end product will be subjected to harsh laundering. It is Oeko-Tex® certified to be free from harmful substances.

Digitizing: Average 4.0 density

Recommended Needle: #65/9 or #75/11

#### **POLYNEON #60**

This thread offers the same shine and strength as #40 Polyneon, but is thinner, having been created for designs that require small lettering or intricate detailing. It is ideal for small lettering down to 3mm tall and also for intricate detailing. Small lettering appears crisp and easy to read. Made from 100% polyester, it is strong and constructed of a specially developed raw material intended to eliminate looping, puckering and thread breaks. Vibrant colors are glossy, as well as resistant to chlorine bleach, making this thread ideal for commercial linens or any application where the end product will be subjected to harsh laundering. It is Oeko-Tex® certified to be free from harmful substances.

Digitizing: Average 3.5 density

Recommended Needle: #65/9 or #70/10

*Some items ship from select locations. Please see item description for details.*

#### **POLYNEON #75**

This is the thinnest embroidery thread on the market. It is ideal for small lettering down to 2.5mm tall and also for the most intricate of details. Small lettering appears crisp and easy to read. It is also used for attaching small sequins and for intricate filigree embroidery. Made from 100% polyester, it is strong and constructed of a specially developed raw material intended to eliminate looping, puckering and thread breaks. Vibrant colors are glossy, as well as resistant to chlorine bleach, making this thread ideal for commercial linens or any application where the end product will be subjected to harsh laundering. It is Oeko-Tex® certified to be free from harmful substances.

Digitizing: Average 3.5 density

Recommended Needle: #60/8
